

Help make the MND breakthroughs of tomorrow, today

MND has no known cause, and for most, treatment options are limited. But there is hope.

aibn.uq.edu.au/givingday

On Wednesday 15 October, the Australian Institute for Bioengineering and Nanotechnology is joining UQ Giving Day to **raise funds for 50 medical smartwatches.**

These devices can be worn by **MND Warriors** in the comfort of their own homes, capturing real-time insights for an upcoming clinical trial's promising new therapy. This will bring us closer to breakthroughs that could change lives.

Scan the code to give online.

“Working with Associate Professor Shyuan Ngo and the team feels like magic, and I know that together, we can change what MND means for families like mine.”

– Heather, MND Warrior.
